RADICALLY SHARED ALIVENESS

August 27/28, 2022
Pontresina
Switzerland

The earth is our home and reason for life
The music of life we play together
Are you with us?

Imagine, surrounded by the splendour of the Engadine valley, in the forests, meadows, mountains, glaciers, on paths and roads: an exploratory journey is launched and **radically shared aliveness** is being discovered – and you are part of it!

A weekend including **hikes** among **animals** and **plants**; **philosophical explorations** on an **economy of love** and the **common good**; a **parliament of things**; a **night of dancing shamans**, lots of **dialogue** and and the **premiere of a new composition** by Gérard Zinsstag.

Photo: Andreas Weber

We open the WorldEthicForum to all who want to experience and celebrate radically shared aliveness together with our **Fire-keepers**.

The Firekeepers are people from many parts of the world who dedicate their lives to **social transformation** and developing **livable futures** for our children and grandchildren. In particular, they are dedicated to recognising the **rights of the Earth and all living creatures**.

Among the Firekeepers are councillors of the World Future Council, such as **Auma Obama** (chairperson of the forum), **Vandana Shiva** (Alternative Nobel Prize winner), the author **Bayo Akomolafe** (narrative philosophy), **Andreas Weber** („Enlivenment“) and **Minna Salami** („MsAfropolitan“), the MIT professor **Otto Scharmer** („Theory U“), **Christian Felber** („Economy for the Common Good“), **Helmy Abouleish** („Economy of Love“), **Marie-Claire Graf** (Youth Ambassador for Climate) and many more engaged people from fields such as art, law, ethics, natural medicine, agriculture, politics, transformation and peace work.

We aim for an applied and participatory exploration of the question: how do we achieve a new **responsibility** and **life-affirming relationship** with ourselves and the earth?
